Chlorobenzene

Chlorobenzene is a colorless organic liquid with a faint, almond-like odor. The greatest use of chlorobenzene is in the manufacture of other organic chemicals. Chlorobenzene may cause health problems if present in public or private water supplies. Chlorobenzene is a solvent, a degreasing agent, and a chemical intermediate. Limited information is available on the acute short-term effects of chlorobenzene. Acute inhalation exposure of animals to chlorobenzene produced narcosis, restlessness, tremors, and muscle spasms.

To protect and improve the health of all Ohioans. Chlorobenzene. Answers to Frequently Asked Questions. Chlorobenzene. Chlorobenzenes are produced using the technology of direct catalytic chlorination of benzene. We produce a high quality monochlorobenzene for your research needs. Find product specific information including CAS, MSDS, protocols and Reactivity of chlorobenzene and benzene in electrophilic substitutions.

Chlorobenzene - Wikt. Chlorobenzene is used primarily as a solvent, a degreasing agent, and a chemical intermediate. Limited information is available on the acute short-term effects of chlorobenzene. Acute inhalation exposure of animals to chlorobenzene produced narcosis, restlessness, tremors, and muscle spasms. Chronic Toxicity Summary for Chlorobenzene - oehha.

As we know, chlorobenzene is a deactivating substituent and benzene has a stable structure. Now I'm confused. My question is — considering the reactivity of chlorobenzene, can toluene replace chlorobenzene as a solvent? - ResearchGate.

EPA regulates chlorobenzene in drinking water to protect public health. Chlorobenzene may cause health problems if present in public or private water supplies. Chlorobenzene is a solvent, a degreasing agent, and a chemical intermediate. Limited information is available on the acute short-term effects of chlorobenzene. Acute inhalation exposure of animals to chlorobenzene produced narcosis, restlessness, tremors, and muscle spasms. Chronic Toxicity Summary for Chlorobenzene - oehha.

Health Alert Code Key: EXTREME. HIGH. MODERATE. LOW. Section 1 - CHEMICAL PRODUCT AND ATSDR - Toxic Substances - Chlorobenzene. Chlorobenzene is used primarily as a solvent, a degreasing agent, and a chemical intermediate. Limited information is available on the acute short-term effects of chlorobenzene. Acute inhalation exposure of animals to chlorobenzene produced narcosis, restlessness, tremors, and muscle spasms. Chronic Toxicity Summary for Chlorobenzene - oehha. As we know, chlorobenzene is a deactivating substituent and benzene has a stable structure. Now I'm confused. My question is — considering the reactivity of chlorobenzene, can toluene replace chlorobenzene as a solvent? - ResearchGate.
