NRDC: NORTH CAROLINIA'S CLEAN ENERGY FUTURE PDF Hot water heating accounts for about 90% of your washer's energy use, so wash laundry in cold water whenever possible. Wash full loads or, if you must wash a small amount of laundry, use the smallest load setting. If you do not need to wash your laundry, consider air drying or line drying it. This can save you money and reduce your energy consumption.

North Carolina House of Representatives Millis, Hager, Collins, and Warren introduced legislation to curb the growth in North Carolina's oil and gas refining and marketing gasoline producing chemicals and refining gasoline in North Carolina. These configurations are available for solar photovoltaic, wind, and solar thermal. North Carolina is taking advantage of new improvements.
