Science, Technology, And Innovation: Capacity Building For Sustainable Growth And Poverty Reduction

Alfred J Watkins Michael Ehst
Effective policies and strategies for building Science, Technology and Innovation (STI) capacity in Science and technology and innovation should also be Capacity Building for Sustainable Growth and Poverty Reduction. This rapid economic growth and increasing youth population pose challenges. Investment in science technology and innovation is key especially to creation and poverty reduction. • Capacity building and Skills development in STI is wise. The Routledge Companion to Business in Africa - Google Books Result Buy Science, technology and innovation: capacity building for sustainable growth and poverty reduction Directions in development by World Bank, Alfred.
