The Effects of the California Voucher Initiative on Public Expenditures for Education: Executive Summary

Supporters of school vouchers argue that they would come with a variety of benefits, including increased competition and innovation in the education sector. They claim that vouchers would result in lower costs, higher quality education, and greater parent choice.

Other educational libertarians argue that vouchers would come with significant drawbacks. They call for simultaneously ending public funding and provision of education, which they believe would exacerbate the problems associated with government control. We understand the debilitating effects of depending on government to do things that could be said about any initiative to privatize schooling?
